

How can I get my credit report?

A credit report is a summary of your personal credit history. Your credit report includes your identifying information — like your address and date of birth — and information about your credit history.

Obtaining a credit report differs in each country. We've listed some links below to help you. If any of these options are no longer available, or your country is not listed, please contact your local bank for guidance on how to obtain your credit report.

Please make sure that the credit report includes information such as:

- Your name
- The name, logo, letterhead, or email address of the credit bureau
- The document/email/screenshot must not be older than 90 days from the date it is submitted in your application and the date must be visible

Country	Credit Bureau Links
